

The company:

opsira GmbH is an engineering company for optical systems engineering. We develop optical systems of non-imaging and imaging optics as well as optical measurement systems for well-known customers worldwide.

Our measurement services regarding light sources, luminaires, optical devices or materials round off the spectrum of the **opsira** GmbH.

We are looking forward to the future's challenges. We are seeking you as a motivated student planning a diploma thesis/practice term/internship described underneath. You will find a modern workstation within a young and dynamic team. Our company is located in a very attractive holiday region in the south of Germany near Lake Constance and the Alps offering a lot of ideal recreational possibilities.

Diploma Thesis/Practice Term/Master Thesis/Internship

Your job function:

You can choose among themes regarding optical measuring devices, the construction of optical measuring instruments, optical sensor engineering or the design of programs for the measurement data analysis.

Your profile:

You enjoy working within a young and ambitious team and are looking for a diversified and interesting diploma thesis or practice term/internship.

Knowledge in technical optics or illumination engineering is not necessary, but helpful.

Are you interested? Please get in touch with us.
Mr. Weißhaar and Mr. Schumacher will be glad to give you more information. We are looking forward to meeting you soon!
