

The company:

opsira GmbH is an engineering company for optical systems engineering. We develop optical systems of non-imaging and imaging optics as well as optical measurement systems for well-known European customers.

Our measurement service regarding light sources, luminaires, optical devices or materials rounds off the spectrum of the **opsira** GmbH.

We are looking forward to the future's challenges. We are seeking you, a motivated student (computer scientist) planning a practice term/internship with a programming task.

You will find a modern workstation within a young and dynamic team.

Our company is located in a very attractive holiday region in the south of Germany near Lake Constance and the Alps offering a lot of ideal recreational possibilities.

Practice Term/Internship/ Master Thesis/Job

Your job function:

You can choose a **software programming** task out of the following areas: image processing, optical measurement technique, optical sensor engineering and measurement data analysis.

Your profile:

You enjoy working within a young and ambitious team and are looking for a diversified and interesting job. C++ programming knowledge is a condition, knowledge of QT would be advantageous for the job.

Are you interested? Please get in touch with us.

Mr. Weißhaar and Mr. Schumacher will be glad to give you more information.

We are looking forward to meeting you soon!
